

Appraisal Report

As of February XX, 20XX

Make	Harley Davidson
Model	Custom
Year	1976
Body Style	Custom Sport
VIN	9D29XXXXX
Engine Number	9D29XXXXX
Mileage	0XXXXX Miles
Engine	1200 cc

Paint

Colour	Black.
Condition	The motorcycles fenders and gas tanks have been repainted having a strong colour and excellent shine with no scratches, chips or fading.

Body

Appearance The front fender covers approximately 1/3 of the front tire. The front fender has a bright finish with no scratches or dents, fitting snugly over the tire with chrome support brackets holding it in place. The full rear fender extends downward to about the middle of the rear tire. The driver's seat is fitted between the gas tanks and rear fender, while the passenger's seat is fitted on top of the rear fender. There is a chrome backrest behind the passenger seat. The front forks have been raked forward having chrome shock absorber tubes and housings. The headlight housing is aftermarket chrome with a halogen bulb. The chrome handlebars are the raised style with chrome brake and clutch levers.

Frame

The frame is the original frame to the motorcycle, however it has been modified to create the extended front forks. The frame is painted with black enamel and is in very good condition, having no signs of damage and only minor signs of surface rust.

Front Forks

The shock absorber bodies are chromed with a bright shine and no imperfections in the chrome. The custom chrome shock tubes are longer than factory spec. The tubes are in excellent condition with no scratches or any signs of damage. The shock seals show no signs of leaking. The handlebars are chrome with an excellent finish and no signs of physical damage.

Rear Swing Arms and Shocks

The swing arms are chrome. The arms appear straight with no scratches or dents. The rear shock absorbers are painted black with chrome springs and outer sleeves. The shocks and springs are new and in good working condition.

Mirrors

The new mirrors are chrome with stretched diamond shape and stylized mirror support. The mirrors and supports are in excellent condition with no signs of silvering of the glass or pitting of the chrome.

Instruments

The instrument cluster is mounted on the top of the gas tanks. The gauges include mechanical speedometer along with several warning lights. The chrome instrument cluster is in excellent condition with no signs of scratches and having a bright shine.

Lights and lenses

The headlight is a new chrome teardrop style with halogen bulb. The taillight is an aftermarket assembly that has a skulls face over the lense with the red lense clearly visible through the eyes, nose and mouth. There is an additional brake light over the licence plate. All light and lenses are new, in excellent condition, having a strong colour, bright shine and no cracks.

Seats

There are two seats, the drivers sitting low behind the gas tanks and the passengers is higher placed on top of the rear fender. The seats are black leather having two rows of stitching following the contour of the seats. There is a row of chrome studs near the bottom edge of the seats. The passenger seat has an approximately 18 inch high chrome backrest. The seats are in excellent condition, having firm seat foam with pliable leather to the touch. There are no scratches, cuts, or defects in the leather.

Engine

The engine is a rebuilt 1200 cc V twin cylinders, 4 stroke, with one carburetor. The carburetor has a chrome air filter. The engine is equipped with cast aluminum engine block, cylinders and cylinder heads. The engine block and cylinders are unpainted having a dull finish. The exhaust pipes are custom bent, chromed with heat blue near the cylinder heads. The engine is fitted with chrome rocker boxes and push rod tubes. All bolt on side covers have been up graded to chrome including the oil reservoir and battery box. The starter motor, transmission case and shift linkage are chrome. The engine is fitted with a chrome oil cooler that sits on the front of the engine. The engine is fitted with a chrome kick start assembly. All chrome components are in excellent condition with no scratches, dents, or pitting and is highly polished. The engine appears to be in excellent condition with no signs of any leaks.

Brakes

The motorcycle is equipped with hydraulically actuating brakes. The brake calipers and rotors are from "Performance Machine". The rotors are single disc cross drilled with stainless steel braking surface and chrome center. The front brakes have a two piston chrome caliper and the rear brake have a four piston chrome caliper. The rear brake caliper brackets are all chrome. The brake master cylinder is also chrome.

Tires

The front tire is Dunlop D401 F and the rear is Avon 140/90B16 with a touring tread pattern. The tires are in new condition with some signs of wear.

Wheels

The wheels have 7 pairs of stylized chrome spokes. The rims are in excellent condition with no signs of any scratches or dents. The rims do not appear to be bent.

Special Features

This motorcycle is a complete customization. The motorcycle is fitted with forward mounted chrome foot controls with custom chrome supports. There are chrome horns, custom chrome front and rear foot pegs, rectifier, oil filter, rear fender and seat support bars, kickstand, and chain guard. There are chrome skull head gas caps.

Comments

This motorcycle is in excellent condition and is an excellent weekend cruiser or show bike. I feel the fair market value of this motorcycle is \$XX,XXX.00 CDN including applicable taxes.
